

PowerBoss

The Power of Clean

SUPERIOR ECONOMIC EFFICIENCY

POWERFUL CYLINDRICAL BROOM

SWEEPING PERFORMANCE UP TO 25,000 m²/h

HIGH DUMP

MACHINE PICTURED WITH OPTIONAL EQUIPMENT

ARMADILLO 9XR | SWEEPER

Powerful Dust Filter System

No-tools quick-change filter for easy routine maintenance. Dual dust filter as a standard. Four-stage dust filtration system.

Stage 1: Vacuumized main broom chamber.

Stage 2: Pre-filter eliminates dust before it reaches the panel filter.

Stage 3: Efficient synthetic panel filter.

Stage 4: Powerful filter-cleaning motor.

1

Engine Swing

360-degree engine and hydraulics accessibility for ease of maintenance, less down time and more productivity.

2

High Dump

The heavy-duty steel hopper can be lifted from ground level up to 1.62 m for variable dumping.

3

High Capacity Hopper

The large 600-litre debris hopper guarantees long operating times for best possible economic efficiency.

4

Rotary Trash Relocater-System

The high-capacity 600-litre hopper combined with the unique RTR system yields the perfect blend of long running time and economic efficiency. The RTR system rotates the hopper and moves debris from the hopper lip to the front part of the hopper to increase the hopper's capacity by up to 50%.

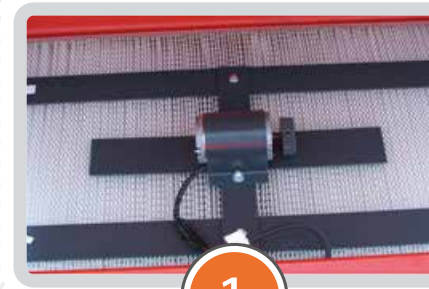

5

Power Climb

The machine is capable of climbing high kerbs and managing up to 16 % inclines while sweeping and with fully loaded hopper.

Powerful benefits

- R360-degree maintenance accessibility to engines and hydraulic systems
- Very economic and durable, less down time and lower maintenance costs.
- Comfortable high dump up to 1.62 m from ground level.
- Coarse dirt access door: operator can place items in hopper that should not be swept.

THE ARMADILLO 9XR | FEATURES AND BENEFITS

FEATURES

Engine Swing

All-steel construction

600-litre debris hopper

Rotary Trash Relocater-System (RTR)

Coarse dirt access door

Power Climb

DIMENSIONS

Length	267 cm
Width with 1 side broom	169 cm
Height above steering wheel	147 cm
Height with overhead guard	206 cm
Weight, ready for operation	1.710 kg

SWEEPING SYSTEM

Main cylindrical broom	122 cm
Side broom	61 cm
Sweeping path with 1 SB / 2 SB	156 cm / 193 cm
Sweeping performance with 2 SB	up to 25.000 m ² /h
Hopper	with high dump
Hopper volume	600 Litres
Hopper load capacity	600 kg
Filter surface (standard)	11 m ²
High dump	162 cm

THE NAUTILUS

The Nautilus is one of the most amazing water creatures in the sea. It is considered a symbol for strength and longevity because its armour-like shell can withstand extremely high pressure due to its natural design. This simply had to be the name for the new PowerBoss scrubber sweeper.

The NAUTILUS scrubber sweeper offers your company exceptional added value. Large water capacities provide longer cleaning time; heavy-duty stainless steel components reduce maintenance costs and the machine's unmatched manoeuvrability helps to ensure professional cleaning results. Experience the difference.

Excellent manoeuvrability
